Errata for

"An Introduction to Infinite-Dimensional Differential Geometry"

The list below collects errata and misprints for the first edition of "An Introduction to Infinite-Dimensional Differential Geometry" published by Cambridge University Press.

Special thanks go to S. Stroppel and T. Nilssen who made me aware of many of the errors compiled below. Last changes: June 28, 2023

- p.4 Theorem 1.7: Not strictly an error, but add the following to the last sentence: ..., that is, for each pair $x, y \in E, x \neq y$ there exists a continuous linear $\lambda \colon E \to \mathbb{R}$ such that $\lambda(x) \neq \lambda(y)$.
- p.10 proof of 1.20: $E \times F$ instead of $E_1 \times E_2$ and H should be F.
- p.12 proof of Lemma 1.25, line 5: missing t_n^{-1} between the limit and the bracket.
- p.18 proof of 1.39 line 4 of the proof $V_{\phi} \colon F \to V_{\phi}$ should read $V_{\phi} \cap F_{\phi} \to V_{\phi}$. line 8 of the proof $f^{-1}(U_{\phi})$ should be $f^{-1}(U_{\phi} \cap N)$. In this and the next line the spaces F should be F_{ϕ} .
- p.19 Lemma 1.41 proof of (b) the Formula should read

$$h_{\psi} \circ h_{\phi}^{-1}(y) = \dots = d(\psi \circ \phi^{-1})(p_{\phi}; y).$$

- p.20 l.3 in the displayed formula replace v with y.
- p.62, 3.31.: The definition of the logarithmic derivative should read

$$\delta^{\ell}(c) : [a, b] \to \mathbf{L}(G), \quad t \mapsto T\lambda_{c(t)}^{-1}(\dot{c}(t)).$$

- 4.17: S_2 and $S_{U,2}$ are the same map, so S_2 should be relabeled $S_{U,2}$.
- p. 123, Exercise 6.1.1 (b) $\overline{\{y \in M \mid h(y) \neq y\}}$ instead of $\overline{\{y \in M \mid h(x) \neq x\}}$.
- p. 139, the integral in the statement of 7.2 should be \int_0^1 not \int_a^b . In the proof it should rather be $\text{En}(q(s,\cdot))$ instead of En(q(s)). In the displayed equation: c,h in the first term of the first line should be c(t) and h(t), after the first equality, term in the integral should read $g_U(c(t), B_U(c(t), c'(t), c'(t)), h(t))$.
- p. 140, the integrals should be $\int_{\mathbb{S}^1}$ instead of $\int_{\mathbb{S}^1}$
- p. 188, 2nd line of (d): It should be $\alpha^{-1}(U)$ instead of $\alpha^{-1}(U \times U)$, last line of (g) after the first inclusion the w should be a capital W.
- p. 189, end of second line of the proof of A.10 should read $-\lambda N \cap \lambda N \subseteq M$. Delete the sentence starting with "By Lemma A.2(c)..."
- p. 189 Execise A.1.1 is missing at the end of the first sentence "such that $0 \in B^{\circ}$ ".
- p.190. The first displayed equation should read $0 < 3\delta = \cdots \le 2\delta$. In the second displayed equation and later it should be $U_{x_0+y_0}$ instead of U_{x+y}
